

## **Pasadena ISD Curriculum Department** ***Theory of Action***

---

**In Pasadena ISD, we believe all students have the right to a vertically and horizontally aligned curriculum. PISD students will achieve at high levels and be prepared for success in college and the work force through equal access to a rigorous curriculum.**

**Our theory of action is a standards-based model that increases academic rigor while promoting instructional continuity throughout the district. Curriculum standards (TEKS-based and college ready) guide the identification of instructional practices and methods, the development of internal assessment systems, and the selection of resources to support the curriculum. For effective implementation of the curriculum we will provide a systematic, tiered plan for professional development.**

**The PISD curriculum team will develop, disseminate, and support a curriculum framework utilizing teacher and administrator feedback to ensure a coherent district wide curriculum. All teachers will implement the district's curriculum and differentiate instruction to provide equal access for all students. All principals will lead, monitor, and ensure the fidelity of the curriculum.**
